

Fun Run' draws 200

By KEVIN STOKER

Universe Staff Writer

BYU runner, recruited by former track star Paul Cummings, won today's "All For Paul" campaign, called "Fun Run."

At Peterson, a physical education major who transferred from Northern Utah University to run for the BYU team, said the main reason he ran the race was to support the campaign to help Paul Cummings train time for the Olympic Games.

He finished first in the women's race, followed by a male runner from Salt Lake City, and a Webster, Sandy, placed second in the men's race. The winner, a male runner from Salt Lake City, finished first in the women's race.

Among the top finishers was Quintin, who completed the three-mile race in a wheelchair. Gray, a junior at Grove High School, said he works on weights and "runs" about 10 miles in his wheelchair every day. He has competed in the Desert

Trail in Salt Lake City along with several other races and finished first in the Provo, Utah.

John Knight, director of the race, approximately 200 runners completed the race. He said the only complaint heard was the race was too long.

Steve Manning, chairman of the "All For Paul" campaign, said the campaign is still in its first phase of gaining awareness. He said the race was a success and he felt it was a success even though there wasn't as many participants as expected.

Manning said \$700 to \$1,000 was raised in three fund-raising events.

There has been many requests for businessmen to sponsor fund-raising activities, but because we are not allowed to have fund-raising events, we have had to wait before we can get approval," said Manning. He said fund-raising is working now to find out what they can and can't do.

Upcoming fund-raising events include a dance at Uncle Mearns and a dance at Uncle Mearns and a dance at the Terrace in Salt Lake City.

Over 200 runners, most of whom were BYU students, turned out at Saturday's "Fun Run" to help raise funds to allow former NCAA champion Paul Cummings to train full-time for the 1980 Olympics. Cummings is the current American indoor record-holder for the 1500 meters.

Montana and Idaho down through Utah, has recorded two to four micro earthquakes a day, adding up to several thousand a year, yet these earthquakes are not even perceptible.

"It is important that these occur frequently because it indicates that the earth is releasing pressure," Griffin said. The geologist added that when the micro earthquakes stop, the possibility of a major earthquake happening increases.

The most recent serious earthquake along the fault occurred in 1850, although 40 or more small ones have occurred throughout the state.

Even though the fault seems to be dormant, it is considered an active fault zone and has a "high risk factor," Griffin said.

Griffin said that "although the hazards of an earthquake are increasing every day it is useless to panic or worry that today or tomorrow is the day."

Provo Police Chief Steven C. Nielsen said the city has a "basic" civil defense plan to revert to in case of an earthquake.

"The city of Provo has a warning system and a civil defense plan that is adequate. Compared to the surrounding communities, our defense plan is better," Nielsen said.

However, the police chief sees an urgent need for an even better system because of his experience with air warnings during World War II. "I have pointed to the city council a plan that would provide warning sirens throughout the city, yielding a more

defensive, but they don't have the funds to support such an idea," explained Nielsen.

There are too many other priorities that the council needs to attend to before the city's budget allows for such a system. "Unless a non-disaster happens here or in close proximity, it may be years before a warning system is deemed necessary," Nielsen said.

Although the Wash. Fault has been a concern to many people for many years, both men stressed the importance of not getting excited about something that may be years away.

Nielsen said, "We don't want to create a panic and sound like doom-sayers. We just want people to be aware of earthquake likelihood and to know that it exists."

Elder Goasland to give address at Y devotional

Elder Jack H. Goasland, Jr., the newest member of the LDS Church's First Quorum of the Seventy, will speak at Tuesday's Devotional assembly.

The public is invited to attend the 10 a.m. assembly in the Marriott Center.

A special 15-minute narrated slide presentation of the Young Ambassadors trip to China this summer will be shown at the beginning of the assembly. All the performing groups which toured in the United States, Canada and other foreign countries this summer will also be honored at the assembly.

The devotional will be broadcast live over KBYU-FM radio and rebroadcast at 9 p.m. Sunday. It will be relayed on KBYU-TV, Channel 11, three times: Tuesday at 8 p.m., Wednesday at 2 p.m. and Sunday at 9 p.m.

Elder Goasland was called to be a General Authority last September. As part of his current assignments he is managing director of proselyting for the Church Missionary Department and executive administrator of the North Plains area. This area includes the western section of the Midwest to the Rocky Mountains.

Prior to his call to full-time church service, Elder Goasland was vice president of Allied Metals, Inc.

He served as president of the

Artemis Temple Mission from 1975 to 1978 and was regional representative for the Provo Region prior to that time. He also has served as regional representative of the Midvale Region.

From 1972 to 1974, he served as a counselor in the general presidency of the Aaronic Priesthood Mutual Improvement Association and is a recipient of the honorary Master M. Men Award.

He graduated from the University of Utah with a B.S. degree in business administration and served three years as an officer in the U.S. Army.

He and his wife, Gwen Caroline Bradford Goasland, have three sons and three daughters.

He served as president of the

A sculpture celebrating the family will be unveiled on campus today at noon as one of the opening events of BYU's week-long Homecoming activities.

The bronze, slightly-larger-than-life-size sculpture depicting a young father and mother with their two-year-old child toddling between them, is a creation of BYU graduate Dennis Smith.

The sculpture will be located just southeast of the Smith Family Living Center, according to Dr. Blaine R. Porter, dean of the College of Family Living. The public is invited to the unveiling.

The ceremonies will include remarks by the sculptor and BYU President Dallin H. Oaks.

Today, which has been designated Family Day for Homecoming, was chosen as an appropriate day for the

unveiling, said Bruce L. Olsen, assistant to the President — University Relations.

The unveiling has also been designated as the first event of BYU's observance of the LDS Church's bicentennial celebration, marking the 150th anniversary of the founding of the church in modern times.

Smith said he conceived the idea for the sculpture, which he calls "First Child," from his experience during his undergraduate and graduate work at BYU when he met and married his wife and they had their first child.

Smith, who has his home and studio near Alpine, received his bachelor's degree in art from BYU. He sculpted 11 of the lifelike figures for the national LDS Church monument to women at Nauvoo, Ill., and is also responsible for the garden concept around which the monument is built.

He and his wife, Gwen Caroline Bradford Goasland, have three sons and three daughters.

'Extender' saves gas, claims Provo dealer

By GARY BYELLAND

Universe Staff Writer

A Provo automotive shop owner is marketing a "fuel extender" which guarantees a 20 percent increase in gas mileage or your money back.

Hal Fouts, owner of Hot Energy Shoppe, 300 S. 400 West, says the device, when installed in an automobile, will increase gas mileage by about 35 percent and frequently even more. The device works by preheating gas before it enters the carburetor.

"The fuel extender is designed to reduce pollutants as well as increase gas mileage," Fouts said.

He asserted that in normal engine operation, fuel is not dispersed evenly to all the cylinders because heavier mixtures of gasoline reach the cylinders closest to the carburetor. Fouts said the fuel extender heats the fuel, making the air-gas mixture more homogeneous.

Everett G. Larson, a BYU physics professor who has scientifically sound, "its operating principles are sound."

In August 1978 the State of Utah filed suit in the Fourth District Court against Hal Fouts and the Hot Energy Shoppe.

"What the suit asked for was a restraining order to stop distribution of the fuel extender, claiming that the product had been misrepresented. The suit also asked for some form of restitution for two people who purchased the fuel extender," said Thomas S. Taylor, attorney for the Hot Energy Shoppe.

The suit is pending.

The fuel extender has been tested using the Bureau of Motor Vehicle Testing. "It is a valid test of fuel efficiency that is appropriate in determining the fuel-extending value of any fuel or automobile modification, as it would affect the interest of the driving

Editor's note: Persons and organizations wanting to submit items for this column must mail or bring information to The Daily Universe newsroom (535 ELWC) before 10 a.m. the day before the item is to be published. Because of a lack of space in some issues not all items can be printed.

Math 100D Students

All Math 100D students must contact one of their instructors in the math lab, 194 SOCH, immediately.

Computer Seminar

A lecture on single source computer programming for dissimilar architectures will be presented Tuesday by F. Paul Melchick of Sierra University. The lecture will be from 3:10 p.m. to 5 p.m. in 247 MARB and is sponsored by the Computer Science Department.

Table Tennis

Table tennis tryouts will be held at 4:15 p.m. Tuesday in the Games Center, first floor, ELWC. All interested men and women should be in attendance.

Chemistry Seminar

Dr. Martin Schweizer of the Department of Medical Chemistry at the University of Utah will speak at a chemistry department lecture at 3:10 p.m. Tuesday in 248 MARB.

Research Money

The Provo Rotary Club has \$1,000 available for support of four undergraduate or graduate students for the purchase of supplies, equipment, or funding necessary travel associated with research projects proposed by the student.

Interested students should submit a one-page application containing the following information: A description of the proposed research, an itemized budget, an address and telephone number, the signature of a faculty adviser who agrees to supervise the activity, and a schedule indicating when the research will be performed. Applications must be submitted to Leo Vernon, ASB ASB by Oct. 5. Further information may be obtained by calling ext. 3980.

Sunrise Lodge

The Sunrise Lodge at the Aspen Grove Family Summer Camp can now be reserved for family or group winter vacations. The lodge, which is owned by BYU, may be reserved, beginning Oct. 15, by any group at a daily rate of \$75. Weekly rates are also available.

The lodge, located three miles above Sundance Ski Resort on the Aspen Loop, accommodates up to nine people. Reservations can be made by writing the Alumni House on campus or by calling ext. 2513.

ASBYU ratifies appointments

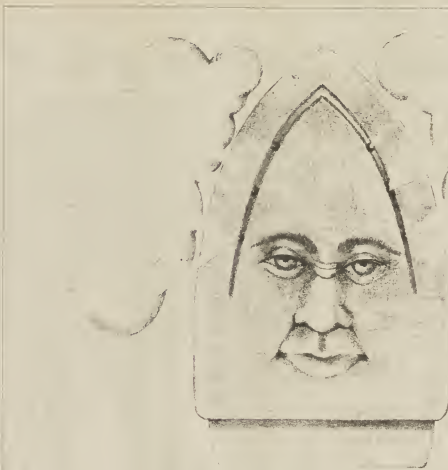

The ASBYU Executive Council ratified the appointment of four student court judges and reapproved the chairman of the Student Research Grants Committee in action last week.

Chris Burdick, a law student and former BYU Supreme Court chief justice, and Francine Moore, from Salt Lake City, were ratified as Commons Court judges.

George Nagle, a student defender summer term, was also appointed as a Commons Court judge.

Jack Hookey, a law student from Centerville, Utah, was ratified as Commons Court senior judge.

The chairman for ASBYU Student Research Fund for last year, Elbert Peck, a master's student from Vienna, Va., was reappointed for the 1979-80 school year.

Don't get all steamed up.

Can't get all the classes you need? Don't let scheduling problems scorch you! Chances are you can take the course you need through BYU Independent Study (formerly Home Study). Independent Study has over 300 college courses, including courses to fill General Education requirements, many major requirements, prerequisites, and upper-division courses. With Independent Study, you won't be confined to pressing schedules or deadlines—take only a few weeks, or take up to a full year to complete a course. Let Independent Study help iron out the wrinkles in your schedule. Enroll at any time during the year at 310 Herald B. Clark Building (just south of the library).

Devey's

University Mall — Trolley Square

Kite's happy he came to Y

By KEVIN STOKER
Universe Sports Writer

More than 200 colleges wanted him. Kentucky, UCLA and Duke heavily recruited him. BYU got him.

Greg Kite, a 6-11, 290-pound center from Houston, Texas, was rated as one of the top prep All-Americans in the nation last year. He averaged 17 points and pulled down 17 rebounds a game while leading his team to the state 4-A season record.

"The game we lost in the semifinals was a rare exception when everybody had a bad game," said Kite.

In the three years he played high school basketball, his team had a 56-15 record and he was twice named to the 4-A All-State team. He said colleges first started recruiting him after his freshman year of high school but didn't start contacting him until his junior season until his junior season.

Kite said by his senior

Greg Kite, left, matches his basketball skills with Fred Roberts during an informal scrimmage in the Smith Fieldhouse.

Three on three

"We were playing three on three and I got a rebound under the basket. When I came down, Danny (Ainge) slipped at my hand instead, breaking the knuckle," said Kite.

Kite pointed out that the injury was at a place that breaks quickly and hasn't hurt his ability to play ball.

Kite, like Mike Maxwell, said he was mostly impressed by the closeness of the BYU players. He also took into account the year the team had lost and the fact the players were all coming back. These factors helped him choose the

Kite said the key to the success of his prep team last year was that the players all got along well off the court as well as playing well together on the court.

"We cared more about the score than about individual statistics. When a team plays good team ball the opposing players can't concentrate on just a few people," said Kite.

Kite said all the players on his high school team are going on to play major college ball except one and he has yet to graduate.

Freshman center

The freshman center said during high school he was invited to summer basketball camps at BYU and Kentucky, but he was not able to attend because of his role in Texas, which prohibits varsity players from attending summer camps. He threatened to keep him from attending.

However, Kite, with help of a young lawyer in his LDS ward who had just graduated from law school, took the case to court and won an injunction allowing him to attend summer camps.

He said that since it wasn't a class case it didn't affect the other prep players in his state.

Kite said football was his first sport in Texas and basketball has just recently gained emphasis in the state.

Kite, a 4.0 GPA political science major, said one of the big reasons he came to BYU was the school's high academic and spiritual standards. He further said he would keep him self worthy to go on a

mission if it was what the Lord wanted him to do.

"If I can do more missionary work playing basketball than I can out knocking down, then that's what I want to do," said Kite.

Kite explained that he is trying to follow President Kimball's command of lengthening our stride and excelling in the talents the Lord has given us.

Kite said his goals at BYU are to never lose a game in his four years, to win an NCAA championship and to always give a total effort in every game.

If BYU wins the NCAA Championship it

would not only be a big benefit to the school but it would be great publicity for the church, said Kite.

NCAA football playoffs considered 'inevitable'

NEW YORK (AP)—A major college postseason football playoff seems to be a dead issue...for now.

But Frank Broyles, Arkansas' athletic director and former football coach, still says such a playoff is "inevitable."

Broyles was one of an outspoken minority whose playoff proposal was beaten down by the hawks.

"We didn't foresee this much organized opposition. We didn't foresee the hawks taking such a strong stand, banding together and rallying support," he says. "It was their asserted opinion that if we had even a four-team playoff."

The NCAA's Extra Events Committee, of which Broyles is a member and former chairman, had recommended that such a playoff proposal be brought before next January's NCAA convention. But the Division I Steering Committee, recommended to the all-powerful NCAA Council that the issue not even come up for a vote.

Nebraska squeaks by Iowa

IOWA CITY, Iowa (AP) — Iowa's 30-year field goal with a 28-21 win in the game, after second-string quarterback Tim Hauck had rallied Nebraska to tie, gave the seventh-ranked Cornhuskers a 24-21 vic-

tory over Iowa in college football Saturday.

Nebraska trailed 21-7 midway through the third quarter, but Hauck scored on a four-yard run late in the period, then directed a 51-yard scoring drive capped by Craig Johnson's five-yard run that tied the score.

After Nebraska recovered on Iowa fumble on the Hawkeyes' next series, Suikup

kicked his game-winning field goal.

Nebraska is 2-0 and Iowa fell to 0-3.

Nebraska had to overcome a rash of fumbles caused by the stubborn Hawkeyes.

The Cornhuskers lost five fumbles, but Iowa could convert only two into scores.

Nebraska got a one-yard touchdown run from starting quarterback Jeff Quinn in the first half, which ended 7-

Annual race to be held on Saturday

The BYU Homecoming committee is sponsoring a five-mile race in conjunction with Saturday's Homecoming parade.

The course of the race will follow the parade route. Registration for the race will begin at 8:30 a.m. at the Marriott Center and the race will start at 9:30 a.m. Saturday.

Twenty-three different divisions have been set up for runners, based on age and with different prizes for men and women. Medals will be awarded to the top three finishers in each division.

Last year, the race drew 485 runners and a 10K run, which is anticipated this year. The course record is held by former BYU track star Paul Cummings.

Women's Field Hockey

Cats prepare for action

Eight returning players will provide the nucleus for the women's field hockey campaign. The Cougars open play the weekend of Sept. 28, hosting Denver University, Colorado College, Penna. State and the BYU Alumni in a 10-4 tournament.

With the experience of a year of regional play pressure in BYU coach Jean Bathgate is counting on to see the difference between a fourth-place contest finish a year ago and this season's championship extending team.

Denver will be the toughest competition. "I rate said, evaluating the Intercontinental etc. Conference Team."

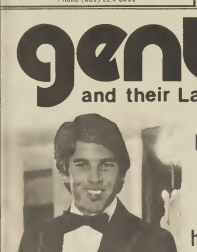

The team's condition with the season opener less than a week away, Bathgate is concerned with the team's condition, but

said she expects the training program implemented over the summer to be a help. "I think we'll be ready when the season opens," Bathgate said. "We're still struggling with stick work, but we'll always be struggling with stick work."

Bathgate said the team's "determined attitude" in what excites her most about the coming competition.

Briefly explaining the game of field hockey, Bathgate, former player on two national championship teams, likened the sport to a cross between hockey and soccer. The coach explained the importance of "fitness and skill" in field hockey as well as the value of endurance.

Checking over her roster, the coach pointed to sophomore Terri Christensen, an all-conference center forward, as "a consistent player with a quick eye."

Much of the team's success this season will be riding on her play.

Senior Sharon Mills, who will be playing a wing

No. 5 Irish steamed; lose to Boilermakers

WEST LAFAYETTE, Ind. (AP) — Quarterback Mark Herrmann passed for two touchdowns and rushed for 11 yards to lead the Irish to a 20-10 victory over the No. 5 Boilers in a game played in front of a record crowd of 38,000.

The Irish, using a set of reserve quarterbacks led by senior Steve Lach, took a 20-7 lead on a 17-yard touchdown pass from Greg Kneafelt to Dean Mautsch and a pair of field goals by Chuck Male.

But Purdue, now 2-1, rallied in the third quarter to tie the game at 20-20.

Oklahoma wins; romps over Tulsa

NORMAN, Okla. (AP) — Julius Cesar Watts, the starting quarterback for No. 1-ranked Oklahoma, led a strong rushing attack as the Sooners routed the 40-13 victory over Tulsa in college football's first weekend of November, meeting Colorado State, Colorado College and Denver.

The opening weekend's matches with Colorado College and Denver will be conference games, as will all of the remaining scheduled contests with the exception of the Boise and Arizona Invitational.

After stalling in the third period, the Sooners scored three times in the final quarter.

Stims complained last week of an injury, which kept him out of some practices.

After stalling in the third period, the Sooners scored three times in the final quarter.

No. 6 Penn State routed by Aggies

STATE COLLEGE, Pa. (AP) — Curtis Dickey gained 184 yards on 31 carries and ran for touchdowns of 49, 11 and 21 yards, as previously winner Texas A&M upset sixth-ranked Penn State 27-14 Saturday in college football.

Penn State, which opened its season last week with a 45-10 triumph over Baylor, took a 7-0 lead two minutes and 36 seconds into the first period on a

three-yard run by Booker Moore.

But after that, the Aggies, who had lost by one point (18-17) to Brigham Young and 17-7 to Baylor, took command.

Just 1:20 later, A&M moved 80 yards on two plays, tying the score. Dickey ran for 10, then took a pitchout and raced 69 yards into the end zone. Freshman barefoot kicker David Hantz converted.

After Penn State had moved from its 44-4 to a first down at the A&M 17 and Herb Marshall missed a 37-yard field goal, the Aggies went ahead on Dickey's 11-yard touchdown run.

The underdog A&M defense shut down the Penn State offense and the Aggies had a 14-7 lead at halftime.

In the third period, Texas A&M boosted its margin to 21-7 on a six-play, 56-yard drive, capped by Dickey's 21-yard romp into the end zone. And in the final quarter, Dickey raced 33 yards to a first down at the two, from where David Hantz carried three times, finally diving into the end zone from the one for a touchdown.

position, is another key player Bathgate is expecting big things from. Rated by her coach as "fast and aggressive," Mills adds much to the team. Likewise, "hard worker," Allison Stewart is looking for to have a role with the Cougars.

On the left wing, junior Barbara Curtis and Canadian Pat Clapton know for their "consistency and aggressiveness" in the nets are looking good in the early going.

Experience and depth

Adding experience and depth to the team will be Wyoming and Boise, both returning from LDS Church missions. Hansen and Boser played on Kathy Lewis' 1977 national tournament team.

BYU, the only school in Utah competing in field hockey at the intercollegiate level, will have to travel far and wide for this year's matches. With the exception of their home opener, the Cougars have only one other home weekend scheduled.

BYU will be on the road for a pair of conference matches Oct. 5 and 6. The Cougars will meet Northern Colorado in Greeley and the University of Colorado at Boulder.

Oct. 12 and 13 will find BYU in Boise for the Boise Invitational and the weekend of Oct. 19 and 20, the Cougars will compete in the Arizona Invitational in Tucson.

BYU will return home the next weekend to host Northern Colorado and Colorado State. The Cougars will close out regular season play on the road the first weekend of November, meeting Colorado State, Colorado College and Denver.

The opening weekend's matches with Colorado College and Denver will be conference games, as will all of the remaining scheduled contests with the exception of the Boise and Arizona Invitational.

Orioles win title Saturday

MILWAUKEE (AP) — The Baltimore Orioles clinched the American League East Division title Saturday when the Minnesota Twins beat the Milwaukee Brewers 6-3 at Hoken Powell and Rob Wilfong each knocked in a pair of runs.
